

## PRESS RELEASE

New EOS Pump Range

January 2011

## NEW EOS PUMP RANGE

**True accelerator of performance for your AIRMIX® Xcite™ gun, the new EOS Kremlin Rexson pump range brings together Efficiency, Optimization and Simplicity.**

They are the very first pumps featuring Kremlin Rexson new design and new colors, therefore increasing dynamism and visibility in paint shops.

With the AIRMIX® Xcite™, the complete outfit benefits of a **quick payback while saving the environment.**

The innovative design and component quality bring **reliability and performance** and allow for **very simple maintenance, easy cleaning and safe color changes** while using a minimum of solvents. The cost of ownership is reduced at a minimum.

The new EOS pump generation concentrates Kremlin Rexson know-how, Experts in Finishing and Dispensing solutions

The new air motor design allows for a **smooth start-up under low pressure air and perfectly controlled fluid output**, without **any pulsation at the gun** with **very low air consumption**. The gun, fed under ideal conditions, offers **exceptional finishing quality and productivity**.

**Last generation paints developed for industrial markets are handle by EOS pump stainless steel construction without any problems.**

EOS pump range is available in wall-mounted versions with air control panel. A large choice of accessories (cart, tripod, product filter, suction rods) are available to fit any customer need.
